

It is my understanding that you are considering making a change so that new Low Power FM stations would take priority over current FM translator service. KLOVE, the radio station I listen to, will be affected by this. There are few radio stations in the country that provide the positive Christian music that KLOVE provides. It is the only one in my community. This station is valuable to my community because it gives me and my family a radio station we can listen to that I know will not broadcast anything inappropriate. They provide encouraging music and valuable information. Please do not make this change. Thank you. Susan Riegler
